

Web Workshop

Victor Tuekam

Code Editing

A code editor is a text editing program designed for specifically editing source code of computer programs.

Download [Visual Studio Code](#).

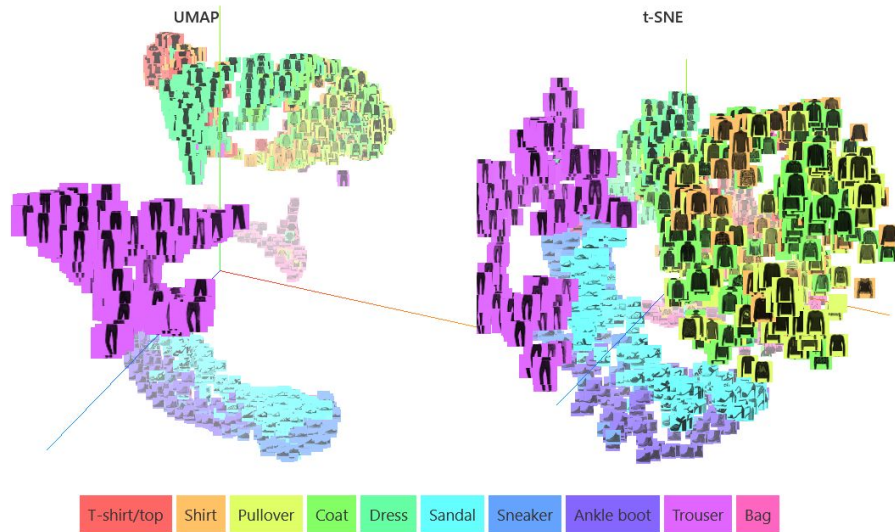

Streamlit

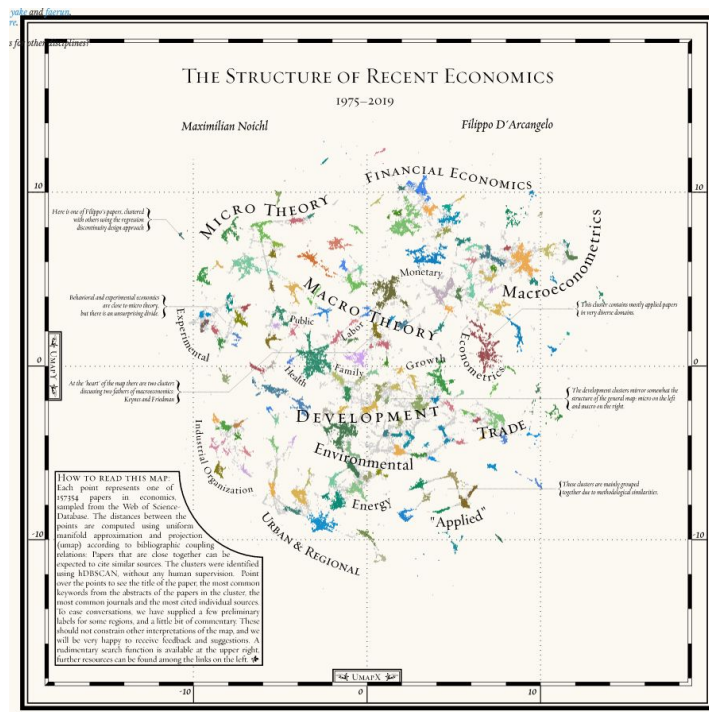

What is Streamlit

- Streamlit is a free and open-source framework to rapidly build and share beautiful data science web apps.
- All in pure python: No knowledge of traditional web development languages needed.
- Has a strong community and is very simple to use.
- You can also deploy these app on the streamlit cloud or host it yourself.

Why Streamlit

Showcasing research interactively

This Workshop

This Workshop

A gentle introduction to Streamlit:

- Main concepts
- Build a machine learning app
